PROFESSIONAL SUMMARY:

- **5+ Years** of Experience in the development of Java Spring Boot Applications
- Ability to understand Functional Requirements and Design Documents.
- Knowledge of Software Requirements Specifications and Software Design Document.
- A team player with strong communication, leadership, analytical, organizational and relationship management skills. Successful track record in accomplishing assigned projects within agreed timelines without incidences of overruns.
- Dedicated, hardworking and focused individual with strong problem solving & analytical skills.
- Demonstrated problem analysis/ resolution skills, ability to troubleshoot, solve problems quickly & completely.
- Worked in persistent technologies like Hibernate, JPA and Spring Data
- Experience in working with MySQL, Oracle Database, MongoDB, PostgreSQL, cosmos
- Experience in RESTful API design and development using Node.js and Spring Boot
- Experience in working with lambda functions Node.js and AWS API gateway
- Proficient in Java and at least one other OOP language such as Kotlin
- Experience with AWS services

Skill Technical Set:

Language	: JavaScript , Java
RDBMS	: MySQL, PostgreSQL, Oracle
NOSQL	: cosmos dB, mongo dB
Frameworks	: Node.js, Express.js , Serverless , Springboot, Jest
IDE	: Eclipse IDE, STS, IntelliJ
Tools	: Maven, GIT, Apache Kafke, RabbitMQ
Cloud	: AWS lambda, Step functions, SNS ,SQS, Amazon API Gateway, CloudWatch, s3

Work Experience:

- Worked as SAP Basis Consultant at Aditya Birla Group (2016 Sept – 2018 Feb)
- Worked as Software Engineer at Aartek Software Solution (2018 Mar – 2021 Nov)
- Worked as Software Engineer at Xtranet Software Solution (2021 JAN – 2021 Nov)
- Currently Working as a Software Engineer at Java Ventures International Pvt Ltd - Bhopal Madhya Pradesh (Nov 2021)

Education Profile:

- **Bachelor of Engineering** from SD Bansal College of Engineering and Technology (RGPV University)
- **Intermediate** from Shri Barfani Dham Public School.
- **10th** from Aditya Birla Public School.

Current Project and Role Details:

Eseal Api Integration -MP Agile (Nov 2021 to Present): -

Role: - Java Developer (backend developer)

Technology Stack: -Java, Springboot, Rest Api, HTML5, CSS, Kotlin, Unit Testing.

Project Description and Client Information: -

Eseal Api Integration is backend applications which is a part of intranet application which is used to deal with providing printing and scanning Eseals and interacting with government Api's. It includes processes from onboarding the inventory to providing or delivering the solutions to the end customer.

Responsibilities: -

- Understanding the stories and discuss with client on the same while creating design documents and impact analysis
- Creating logic and algorithm according to business requirement
- Implementing the business logic and creating REST APIs
- Presenting demo of the modules to clients which I have worked on
- Actively participating in the team discussions for better and effective implementation of the requirements

Project & Role Details:

Health Care Agile (Nov 2021 to Dec 2022): -

Role: - Spring Boot, Rest API's, Angular, JPA, Spring security, Swagger, MySql .

Project Description and Client Information: -

It is based on web application for hospital management. There was the 5 roles admin, patient, doctor, nurse, pharmacist. Admin have all details about other roles and his details. All have separate dashboard to manage his worked.

Responsibilities: -

- Understanding the stories and discuss with client on the same while creating design documents and impact analysis
- Creating logic and algorithm according to business requirement
- Implementing the business logic and creating REST APIs
- Collaborating with frontend developers to integrate the APIs with react layer and do changes if required in server side
- Working for API optimization
- Working with cosmos dB
- Writing test cases for the code coverage using jest.js framework
- Presenting demo of the modules to clients which I have worked on
- Actively participating in the team discussions for better and effective implementation of the requirements

Advanced Statistical System Evaluation tool(ASSET) (Oct 2018 to Aug 2021): -

It is web application. ASSET is a data management information system that produces live reports for any specific group in the same style as the Inspection Dashboard or Summary Report which can then be used for evidencing progress and achievement of pupils with Standards in Education.

Responsibilities: -

- Used Spring Boot and Spring Data frameworks as backend frameworks
- Creating new modules for application as per requirement raised by teams
- Creating table structures, Sequences based on application modules in oracle DB
- Taking the deployments to UAT and production server
- Creating Jobs (Scheduler) for accomplishing sync activities and testing these jobs
- Adding mail notification on every activity such as enrollment and approval etc.
- Supporting application for any issues and resolving all the critical issues raised by resources and HR
- Consuming SOAP services.
- Used Maven as build tool for this portal

Personal Details:

Nationality	: Indian
Status	: Unmarried
Language Known	: English, Hindi.
